

# SAVE THE DATE

8th Annual

## Academic & Industry Intersection Conference

*From Sensors to Big Data: Personalized & Population Health  
in the Digital Age*

### CONFERENCE DETAILS

**May 10, 2017**

9:00 a.m. to 1:30 p.m.

**Georgia Tech Research Institute Conference Center**

#### PURPOSE

This year's conference will explore the digital tools needed to facilitate a vision of personalized connected health and population health management. The event provides a collaborative environment for university researchers and industry executives using a program filled with subject matter experts describing current models and innovative trends shaping the future of translational science through the lens of mobile/digital health. The program includes a national industry perspective, academic experts on digital health, big data integration, and cybersecurity imperatives, and stories of successful academic-industry partnerships and useful collaborative ideas and resources from an expert academic-industry panel. #### ORGANIZERS

The Atlanta Clinical & Translational Science Institute ([ACTSI](#)), led by Emory University with partners Morehouse School of Medicine and Georgia Institute of Technology, and [Georgia Bio](#), the state's life sciences industry association, organizes this conference annually to provide critical information on how academia and industry can work together to translate science into discovery and engage communities in clinical research efforts and outcomes. This half-day conference provides examples on how universities and industry can collaborate effectively, and subject matter experts representing academia, industry, foundations, investors, and governments.
