Molecular and Translational Imaging Workshop: *From Mouse to Man*

Wednesday September 14th, 2011

Presentations: 8:00am – 12:00pm

Location TBA

Lunch: 12:00pm – 1:00pm

Hands-on Training and Imaging Demonstrations: 1:00pm – 4:00pm

Emory Center for Systems Imaging, Wesley Woods Health Center 2nd Floor

****FEATURING****

KEYNOTE SPEAKER

Peter Choyke, MD

**Director, Molecular Imaging Program
National Cancer Institute, NIH**

Event Details

The aim of this one-day workshop is to give a broad introduction to preclinical and translational molecular imaging techniques and their applications in biology and medicine. This workshop is designed for faculty, students, post-doctoral fellows, residents, and researchers within the scientific community of the Atlanta Clinical and Translational Science Institute (ACTSI), which includes Emory University, Georgia Institute of Technology, and Morehouse School of Medicine. Researchers and students from other universities are also welcome. Participation in this workshop is free of charge, but the number of seats will be limited. Additional details, including an agenda and link to registration materials, are coming soon.
